

PROFESSIONAL SUMMARY

Computer Science Undergraduate with strong expertise in Full stack Development and hands-on experience of building scalable, Production-ready web applications using modern frontend and backend technologies. Proficient in REST API Design, Database Management, authentication, and deployment. Possesses a foundational understanding of data management and data handling on professional level.

WORK EXPERIENCE

KNOWFINITY

Data Executive – Full Time (Remote)

Oct 2025-Present

Bengaluru, India

- Handle foreign client data using Job Delegation and Speedy Apply Extensions, transmit records to partner organizations for job applications, and maintain client profiles, ensuring timely delivery of accurate information.
- Manage interview scheduling and assessments for clients and perform hiring tasks, streamlining the recruitment workflow.
- Manage client resumes using Job Right to customize content for target roles, improving candidate visibility and increasing interview callbacks.

TECHNICAL SKILLS

- **Programming Languages:** Java, C, C++
- **Frontend:** HTML5, CSS3, Tailwind CSS
- **Backend:** Java SpringBoot (MicroServices), Node JS, React JS, REST APIs, JWT Authentication, OAuth
- **DataBases:** MYSQL, MongoDB
- **Devops & Cloud:** Vercel, MongoDB Atlas.
- **Tools:** Git, GitHub, IntelliJ, VS Code, Postman, Docker.

CERTIFICATIONS & LICENSES

- Certified Full Stack Developer (Physics Wallah)
- Solved 500+ leetcode problems, strengthening algorithmic thinking and problem solving skills.
- Qualified Gate Exam 2026 from computer science & Engineering

PROJECTS

ShopZone: E-commerce Microservices Platform

- Developed a Spring Boot microservices backend with User, Product, Inventory, Cart, Order, Payment, Notification, and API Gateway services.
- Implemented REST APIs, JWT authentication, service discovery, centralized configuration, Feign-based service communication, and database-backed services.
- Used Docker/Docker Compose and designed scalable service communication with resilience, security and development support.

QuickShow: Movie Ticket Booking System

- Live Demo – GitHub Developed an enhanced platform to book latest release movie ticket, manage seats and timing as per the user Demands.
- Designed relational Database Scheme using MySQL to ensure data integrity.
- Implement payment gateway to ensure reliable transactions.

EDUCATION

Madhav Institute of Science & Technology (MITS-DU)

B.Tech, computer Science & Engineering (GPA: 7.93/10)

Aug 2023 - May 2027

Gwalior, India

- **Coursework:** Data Structure & Algorithm, Database Management Systems, Operating System, Computer Networks, System Design, & Compiler Design.
